Multi-manufacturer brief for first responders, defense, and public safety

LION · Elbeco · Mehler Systems · AeriaOne · Dronivo

ABOUT SALESBOTIX

Trusted manufacturer representation across the Americas, Europe, and APAC

SalesBotix is the authorized representative for advanced public-safety, defense, and tactical technology manufacturers across Latin America and select global markets. We close distance between world-class manufacturers and the agencies, distributors, and end-users who depend on certified equipment to operate at the edge of human performance.

Every product in this catalog is sourced from a manufacturer partner with verified certifications, established supply chains, and proven field deployments. We handle the bridge — commercial relationships, technical qualification, and delivery into market — so operators receive equipment that meets the spec, on schedule, with full lifecycle support.

CATEGORY

Firefighter & Rescue PPE

NFPA- and EN 469-certified personal protective equipment for structural firefighting, technical rescue, wildland response, and CBRN/hazmat operations. Sourced from LION's V-Force, Multi-Purpose, MT94 CBRN, and American Heritage helmet lines, plus the ENGage EN 469 turnout range for European-standard markets.

8 PRODUCTS

ENgage Classic

LION's EN 469-compliant turnout gear built on ergonomic patterning and proven thermal protection. Aramid outer shells and advanced moisture barriers deliver dependable flame and heat defense with reduced water absorption — structural firefighting protection engineered to the European standard.

KEY FEATURES

- EN 469 certified structural firefighting PPE
- Ergonomic patterning for natural range of motion
- Aramid outer shell with advanced moisture barrier
- Reduced water absorption — less added weight when wet
- Quick-release closures and functional pocket layout
- High-visibility reflective trim for low-light operations

CERTIFICATIONS

EN 469

APPLICATIONS

Structural firefighting

ENgage Select

Enhanced EN 469-compliant turnout gear with 3D-spacer thermal barriers and reinforced durability for readiness across diverse operational demands. Balances protection, comfort, and efficiency — with RFID-enabled tracking and strategic reinforcement in high-compression areas.

KEY FEATURES

- EN 469 certified with enhanced durability build
- 3D-spacer thermal barrier for heat management
- Strategic reinforcement in high-compression areas
- RFID-enabled gear-tracking capability
- Ergonomic construction with advanced moisture barrier
- High-visibility reflective configuration

CERTIFICATIONS

EN 469

APPLICATIONS

Structural firefighting

ENgage Ultra

LION's premium EN 469-compliant gear, engineered to minimize added weight from water absorption while maximizing thermal and heat protection. High-performance moisture barriers, 3D-spacer thermal barriers, and cushioned high-compression areas — built for extended operations where every gram counts.

KEY FEATURES

- EN 469 certified, premium material science
- Advanced reduced-water-absorption system
- High-performance moisture + 3D-spacer thermal barriers
- Cushioned high-compression areas for all-day wear
- Reinforced durability construction
- Full ENgage feature set

CERTIFICATIONS

EN 469

APPLICATIONS

Structural firefighting

Extended operations

ENgage Wildland

EN 469-compliant turnout gear adapted for wildland and interface fire operations. Wildland-specific patterning and a lighter shell enhance mobility in open environments while maintaining LION's thermal and flame protection — reinforced knees, articulated coat pleats, and durable aramid construction.

KEY FEATURES

- EN 469 certified, wildland-adapted patterning
- Lightweight shell for open-environment mobility
- Reinforced knees for kneeling and crawling work
- Articulated coat pleats for full range of motion
- Durable aramid construction with quick-release systems
- Thermal barrier protection

CERTIFICATIONS

EN 469

APPLICATIONS

Wildland firefighting

Interface fire

V-Force Turnout Gear

LION's flagship structural firefighting ensemble. Cut-in-motion V-Fit® design delivers ergonomic comfort and uncompromising NFPA 1971 protection. Customizable across materials, sizing, and gear options.

KEY FEATURES

- NFPA 1971 certified structural firefighting PPE
- V-Fit® cut-in-motion ergonomic design
- PCA reinforcement on knees, elbows, kick shields
- Comfort collar with ventilated trim moisture release
- Built with 3M Scotchlite, Gore Crosstech, Kevlar, Nomex

CERTIFICATIONS

NFPA 1971

APPLICATIONS

Structural firefighting

Multi-Purpose Rescue Wear

Lightweight rescue apparel built for extrication, EMS, and wildland response. Certified to NFPA 1951 (Technical Rescue) and NFPA 1977 (Wildland) for cross-mission coverage.

KEY FEATURES

- NFPA 1951 (USAR / Tech Rescue) + NFPA 1977 (Wildland) dual cert
- Lighter weight vs. structural turnouts — reduced heat stress
- Designed for extrication, EMS, and wildland applications
- Reflective trim, mobility-focused articulation
- Pair with LION rescue helmets, gloves, and boots

EMS

Wildland

CBRN Protective Apparel (MT94)

NFPA 1994 MT94-rated CBRN ensemble for chemical and biological hazard response. Provides barrier protection against vapor and liquid chemical warfare agents for tactical and emergency response operators.

KEY FEATURES

- NFPA 1994, Class MT94 certified
- Chemical/biological vapor & liquid barrier
- Tactical and law-enforcement CBRN missions
- Integrates with LION respiratory and footwear lines
- Field-serviceable, with documented decon procedures

CERTIFICATIONS

NFPA 1994

APPLICATIONS

CBRN

Law enforcement

Hazmat

Fire Helmets & Head Protection

Full line of structural and rescue helmets — traditional and modern styles — certified to NFPA 1971. Engineered for impact, thermal, and electrical resistance with integrated face/eye protection options.

KEY FEATURES

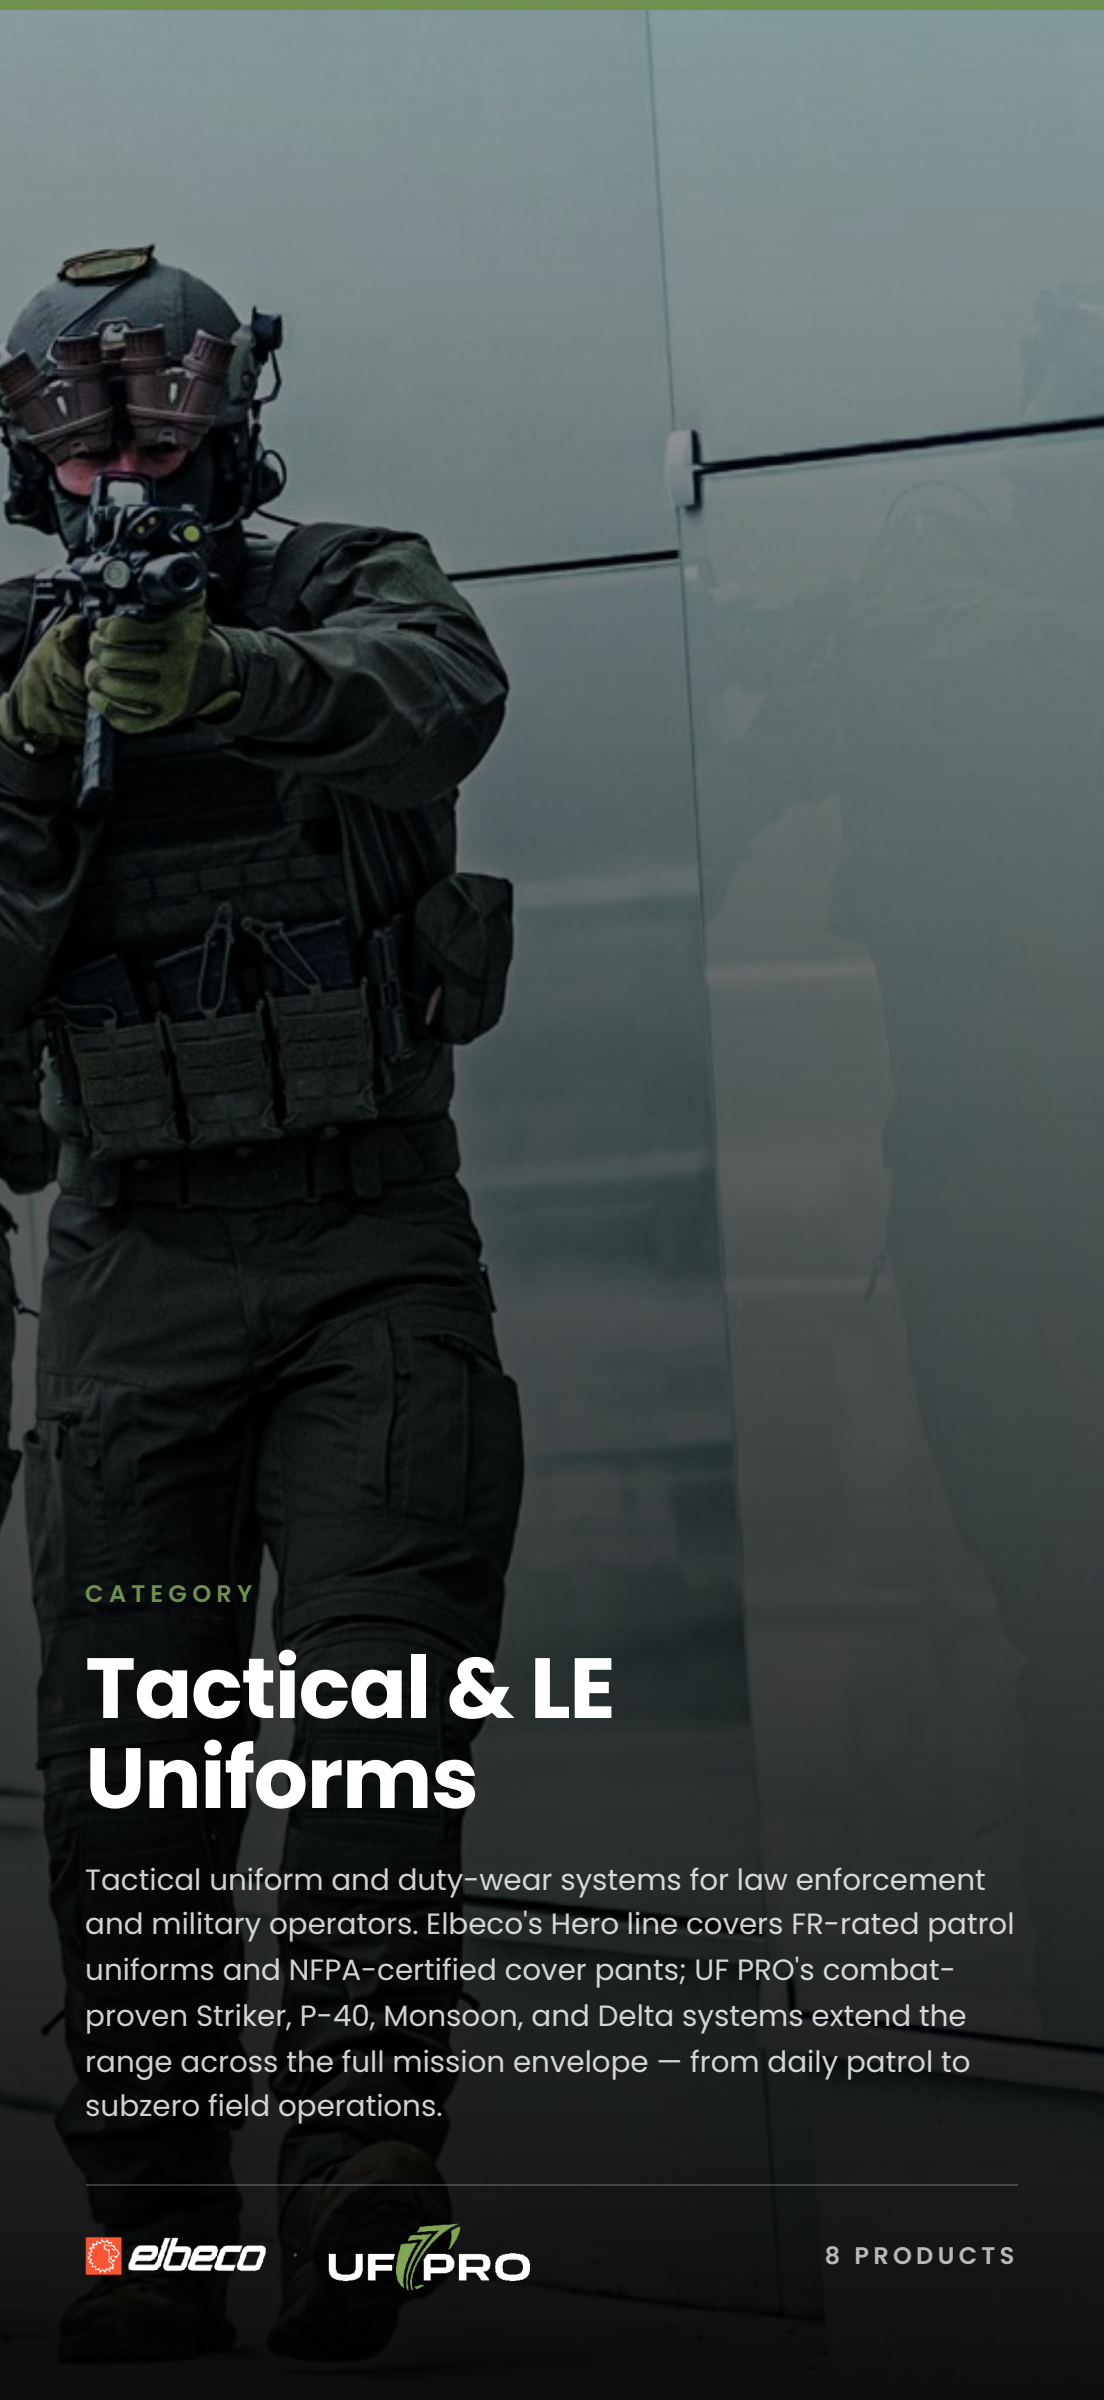

- NFPA 1971 structural firefighting helmet certification
- Traditional, modern, and rescue helmet styles
- Compatible with SCBA, communications, and lighting
- Integrated faceshield / goggle options
- Replaceable suspension, ear flaps, and trim

CERTIFICATIONS

NFPA 1971

APPLICATIONS

Structural firefighting

CATEGORY

Tactical & LE Uniforms

Tactical uniform and duty-wear systems for law enforcement and military operators. Elbeco's Hero line covers FR-rated patrol uniforms and NFPA-certified cover pants; UF PRO's combat-proven Striker, P-40, Monsoon, and Delta systems extend the range across the full mission envelope — from daily patrol to subzero field operations.

8 PRODUCTS

UFX Tactical Uniform System

Modular tactical uniform engineered for law enforcement and military operators. Built on LION's UFX platform with durable, breathable fabrics and articulated cuts for full-range mobility under load.

KEY FEATURES

- Articulated knees, gusseted crotch, bi-swing back
- Reinforced wear points; pleated bellows pockets
- Color and configuration options for LE/MIL units
- Compatible with Elbeco Persist, Polo, and HeroShield
- Suited for patrol, SWAT, and tactical training

APPLICATIONS

Law enforcement

Military

Patrol

SWAT

HeroShield FR Uniform

Flame-resistant tactical uniform engineered for daily patrol duty. NFPA-rated FR fabric with the look and fit of a standard duty uniform — protection without sacrificing professional appearance.

KEY FEATURES

- NFPA-rated flame-resistant fabric
- Daily LE patrol and tactical wear
- Matches standard duty uniform appearance
- Stretch panels and articulated tailoring
- Compatible with HeroCert and HeroGuard lines

CERTIFICATIONS

NFPA 1975

APPLICATIONS

Daily LE patrol

HeroCert Cover Pant

NFPA-certified cover pant designed to deploy rapidly over duty uniforms during emergency or fire response. Bridges daily patrol wear and structural turnout PPE.

KEY FEATURES

- NFPA-certified protective cover pant
- Pulls on over standard duty pants
- Rapid emergency response deployment
- Reinforced knees and reflective trim
- Compatible with HeroShield and HeroGuard

CERTIFICATIONS

NFPA 1977

APPLICATIONS

Emergency response

Patrol

HeroGuard Daily Duty Apparel

All-day duty apparel for first responders. Engineered for comfort, durability, and a uniform appearance compatible with the broader Hero line of FR and certified gear.

KEY FEATURES

- Daily-wear duty apparel for LE and first responders
- Comfort-focused construction and fabrics
- Designed to coordinate with HeroShield and HeroCert
- Standard duty cuts, configurations, and colors
- Long-shift comfort and fit

CERTIFICATIONS

NFPA 1975

APPLICATIONS

Daily LE patrol

First responders

Striker Combat Gear

UF PRO's flagship “fire-and-forget” BDU system. The Striker combat shirt and pants are engineered to disappear on the operator — integrated knee protection exactly where it's needed, mission-essential pockets within hands' reach, and a second-skin fabric that breathes and protects. Also available in flame-resistant (FR) construction.

KEY FEATURES

- Modular combat shirt + pants BDU system
- Repositionable integrated knee-pad pockets
- Mission-essential pockets within hands' reach
- Breathable, abrasion-resistant second-skin fabric
- FR (flame-resistant) construction available
- MultiCam, solid, and Flecktarn colorways

APPLICATIONS

Military

Tactical operations

SWAT

Law enforcement

P-40 Tactical Gear

Modular tactical apparel built to move with you and adapt across environments. The P-40 lineup of pants, shorts, and shirts features integrated knee-protection options, zip-in thermal insulation, and load-bearing compatibility — a system you put on once and rely on throughout the day.

KEY FEATURES

- Modular tactical pants, shorts, and shirts
- Integrated knee-protection options
- Zip-in thermal insulation compatibility
- Load-bearing belt and integration features
- All-Terrain, Classic, Urban, and Range cuts

APPLICATIONS

Law enforcement

Tactical operations

Patrol

Daily duty

Monsoon Rain Gear

A waterproof shell system built for the worst weather a mission can deliver. Monsoon jackets and pants are constructed on best-in-class laminates with robust seam sealing and tactical-specific features, keeping operators dry and functional through sustained downpours.

KEY FEATURES

- Waterproof, breathable laminate construction
- Fully seam-sealed jacket + pants shell system
- Helmet-compatible adjustable hood
- Tactical pocket layout with pit-zip venting
- MultiCam and solid colorways

APPLICATIONS

Military

Law enforcement

Wet-weather operations

Delta Cold Weather Gear

A subzero clothing system engineered to keep operators warm without compromising mobility or moisture management. The Delta range layers insulation jackets, vests, and pants that perform whether climbing a mountain or lying in a ditch for hours — adaptable to any cold-weather activity.

KEY FEATURES

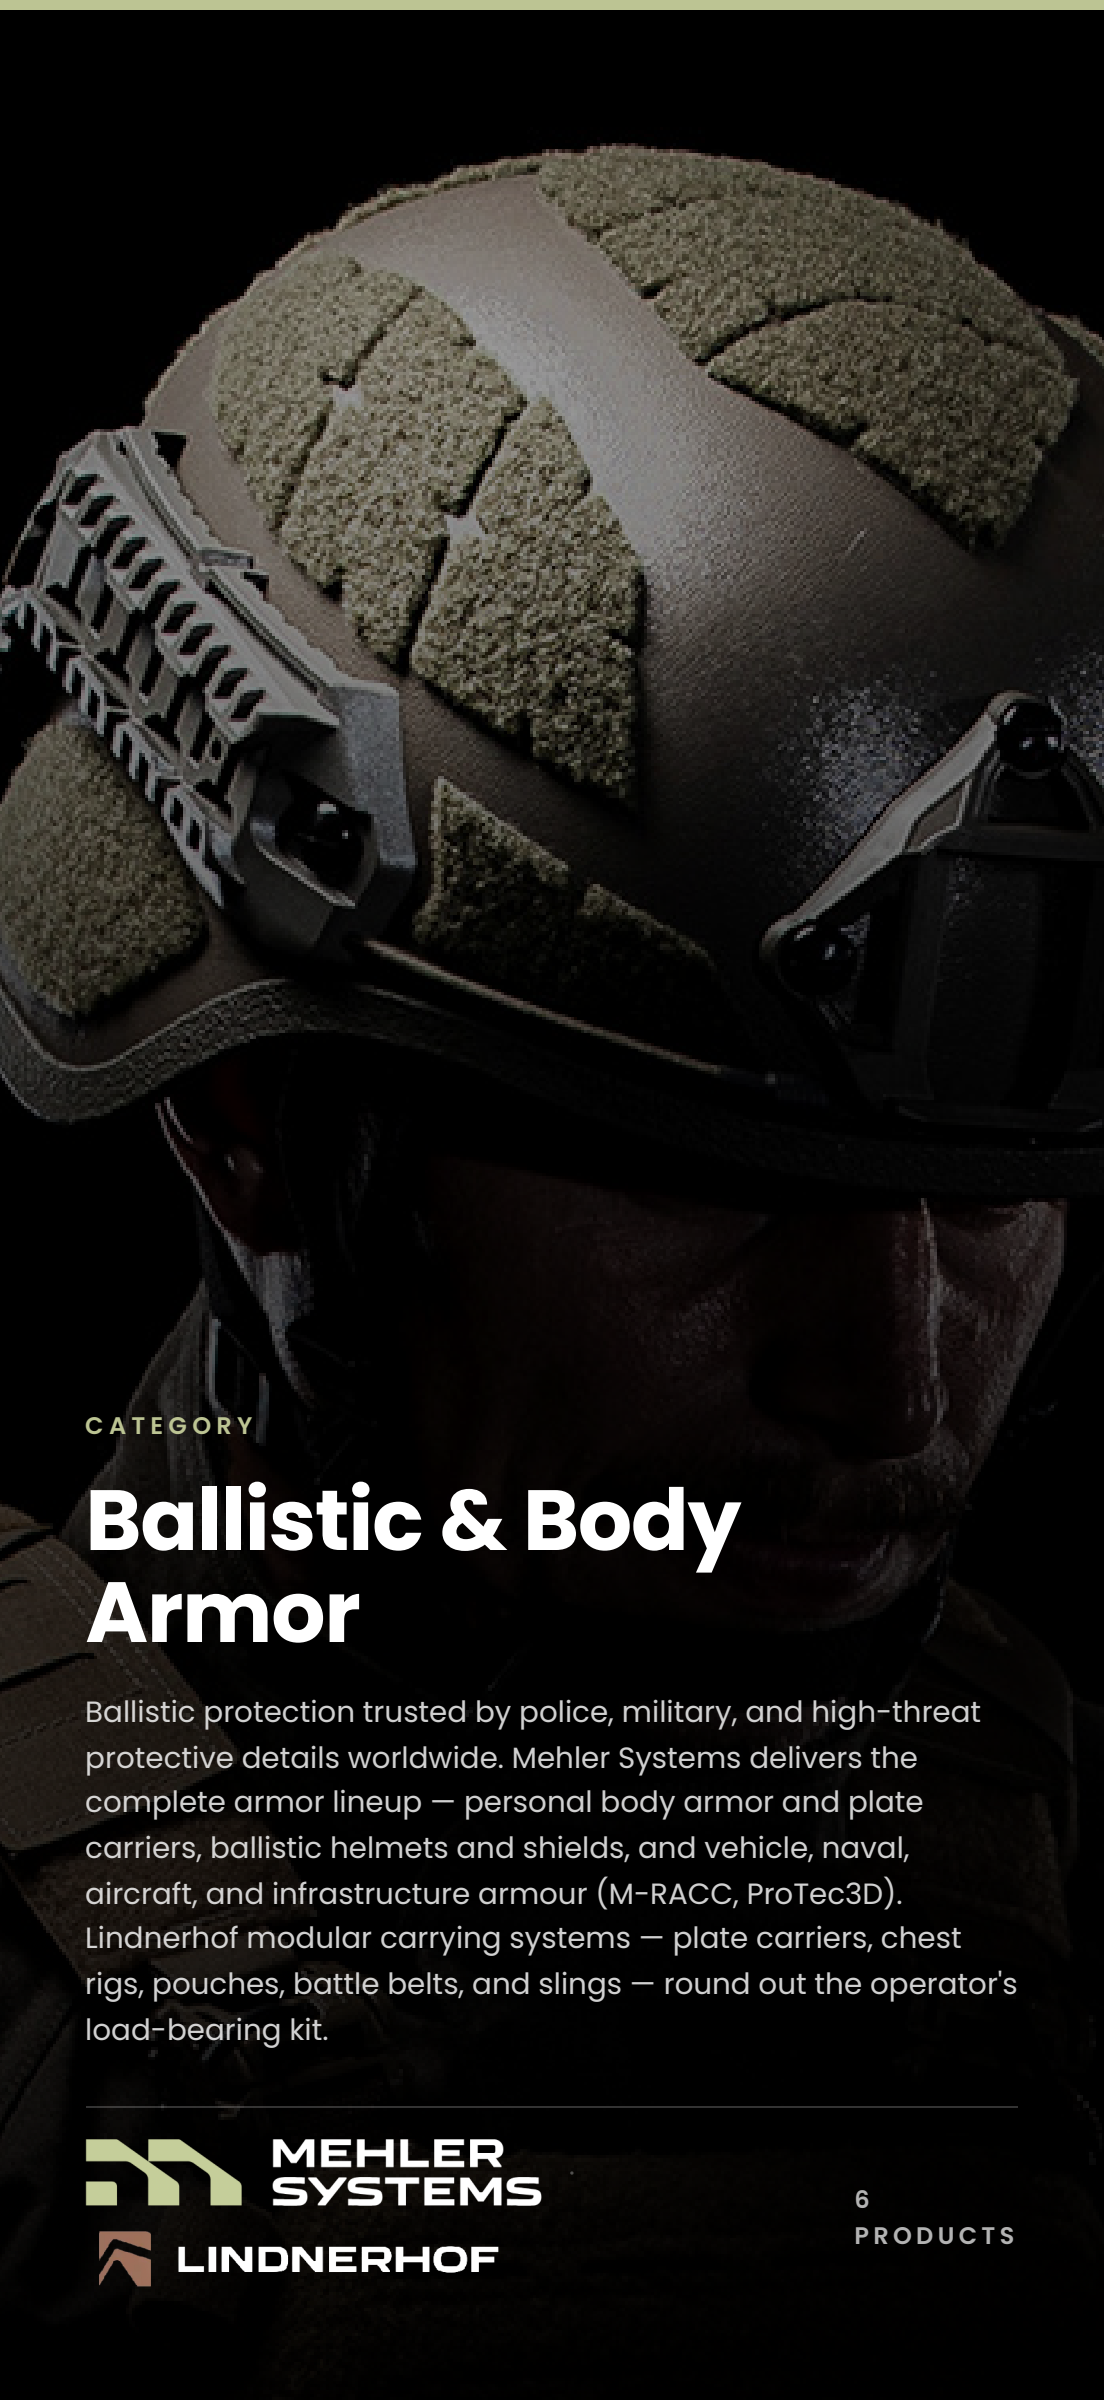

- Layered subzero insulation system
- Jackets, vests, and pants — mix to mission
- Moisture-managing and breathable under exertion
- Freedom of movement preserved under load
- ML, Ace, Compac, and OL configurations

APPLICATIONS

Military

Mountain operations

Cold-weather operations

CATEGORY

Ballistic & Body Armor

Ballistic protection trusted by police, military, and high-threat protective details worldwide. Mehler Systems delivers the complete armor lineup — personal body armor and plate carriers, ballistic helmets and shields, and vehicle, naval, aircraft, and infrastructure armour (M-RACC, ProTec3D). Lindnerhof modular carrying systems — plate carriers, chest rigs, pouches, battle belts, and slings — round out the operator's load-bearing kit.

**MEHLER
SYSTEMS**

LINDNERHOF

6
PRODUCTS

Soft Body Armor & Plate Carriers

Global benchmark in ballistic body armor. Covert and overt vest carriers, soft armor packs, and modular plate carriers engineered for police, military, and high-threat protective details.

KEY FEATURES

- Soft armor up to NIJ Level IIIA / VPAM stab and ballistic
- Covert, overt, and modular plate carrier configurations
- Integrated MOLLE/MOLLE-equivalent attachment options
- Custom sizing, panel, and trauma-pack programs
- Trusted by police and military worldwide

Lindnerhof Modular Carrying Systems

Modular, lightweight load-bearing gear from Lindnerhof — founded by a former KSK operator. Plate carriers and chest rigs, configurable pouches, adjustable battle belts, and weapon slings work as one system so operators carry exactly what the mission demands, nothing more.

KEY FEATURES

- Plate carriers and chest rigs — covert to full-load configurations
- Modular pouches for magazines, radios, medical, and admin
- Adjustable battle belts and duty belts, fully user-configurable
- Weapon slings for hands-free carry and fast transitions
- Lightweight, field-proven, full-function tactical gear

APPLICATIONS

Military

Law enforcement

Special forces

Ballistic Helmets

Lightweight composite ballistic helmets for military, police, and special-forces use. Modular shells with rail and shroud interfaces accept night-vision, lighting, and communications, delivering fragmentation and handgun-threat protection without compromising mobility.

KEY FEATURES

- Aramid/composite shell — NIJ IIIA / VPAM-class protection
- High-cut and full-cut configurations
- Side rails and front shroud for NVG, lights, and comms
- Fragmentation (V50) and handgun-threat tested
- Adjustable retention and impact-liner pad systems

Police

Special forces

Ballistic Shields

German-engineered ballistic shields for tactical teams and public-order units. Hand-held shields for dynamic entry, wheeled shields for sustained protected advance, and anti-riot shields for crowd control — across protection levels from handgun up to rifle threats.

KEY FEATURES

- Hand-held shields for tactical entry and high-risk arrests
- Wheeled / mobile shields for sustained protected advance
- Anti-riot shields for crowd and public-order control
- Protection levels from NIJ IIIA (handgun) up to rifle threats
- Armoured viewport, lighting, and ergonomic carry options

Platform Armour (ProTec3D)

Lightweight composite armour for vehicles, naval vessels, and aircraft. ProTec3D platform armour solutions counter projectile, fragmentation, and blast threats with modular, scalable build-outs.

KEY FEATURES

- Lightweight composite, modular kit architecture
- Threat coverage: KE, fragmentation, IED, mines, blast
- Applications: military and civilian vehicles, naval, aircraft
- Custom-engineered to specific platform requirements
- Field-retrofittable and field-serviceable

APPLICATIONS

Vehicle armor

Naval

Aviation

M-RACC Critical Infrastructure Armour

Multi-Role Armour Composites/Components (M-RACC) — modular armor for protecting power plants, refineries, control cabinets, supply lines, and cable trays from kinetic, blast, and fragmentation threats.

KEY FEATURES

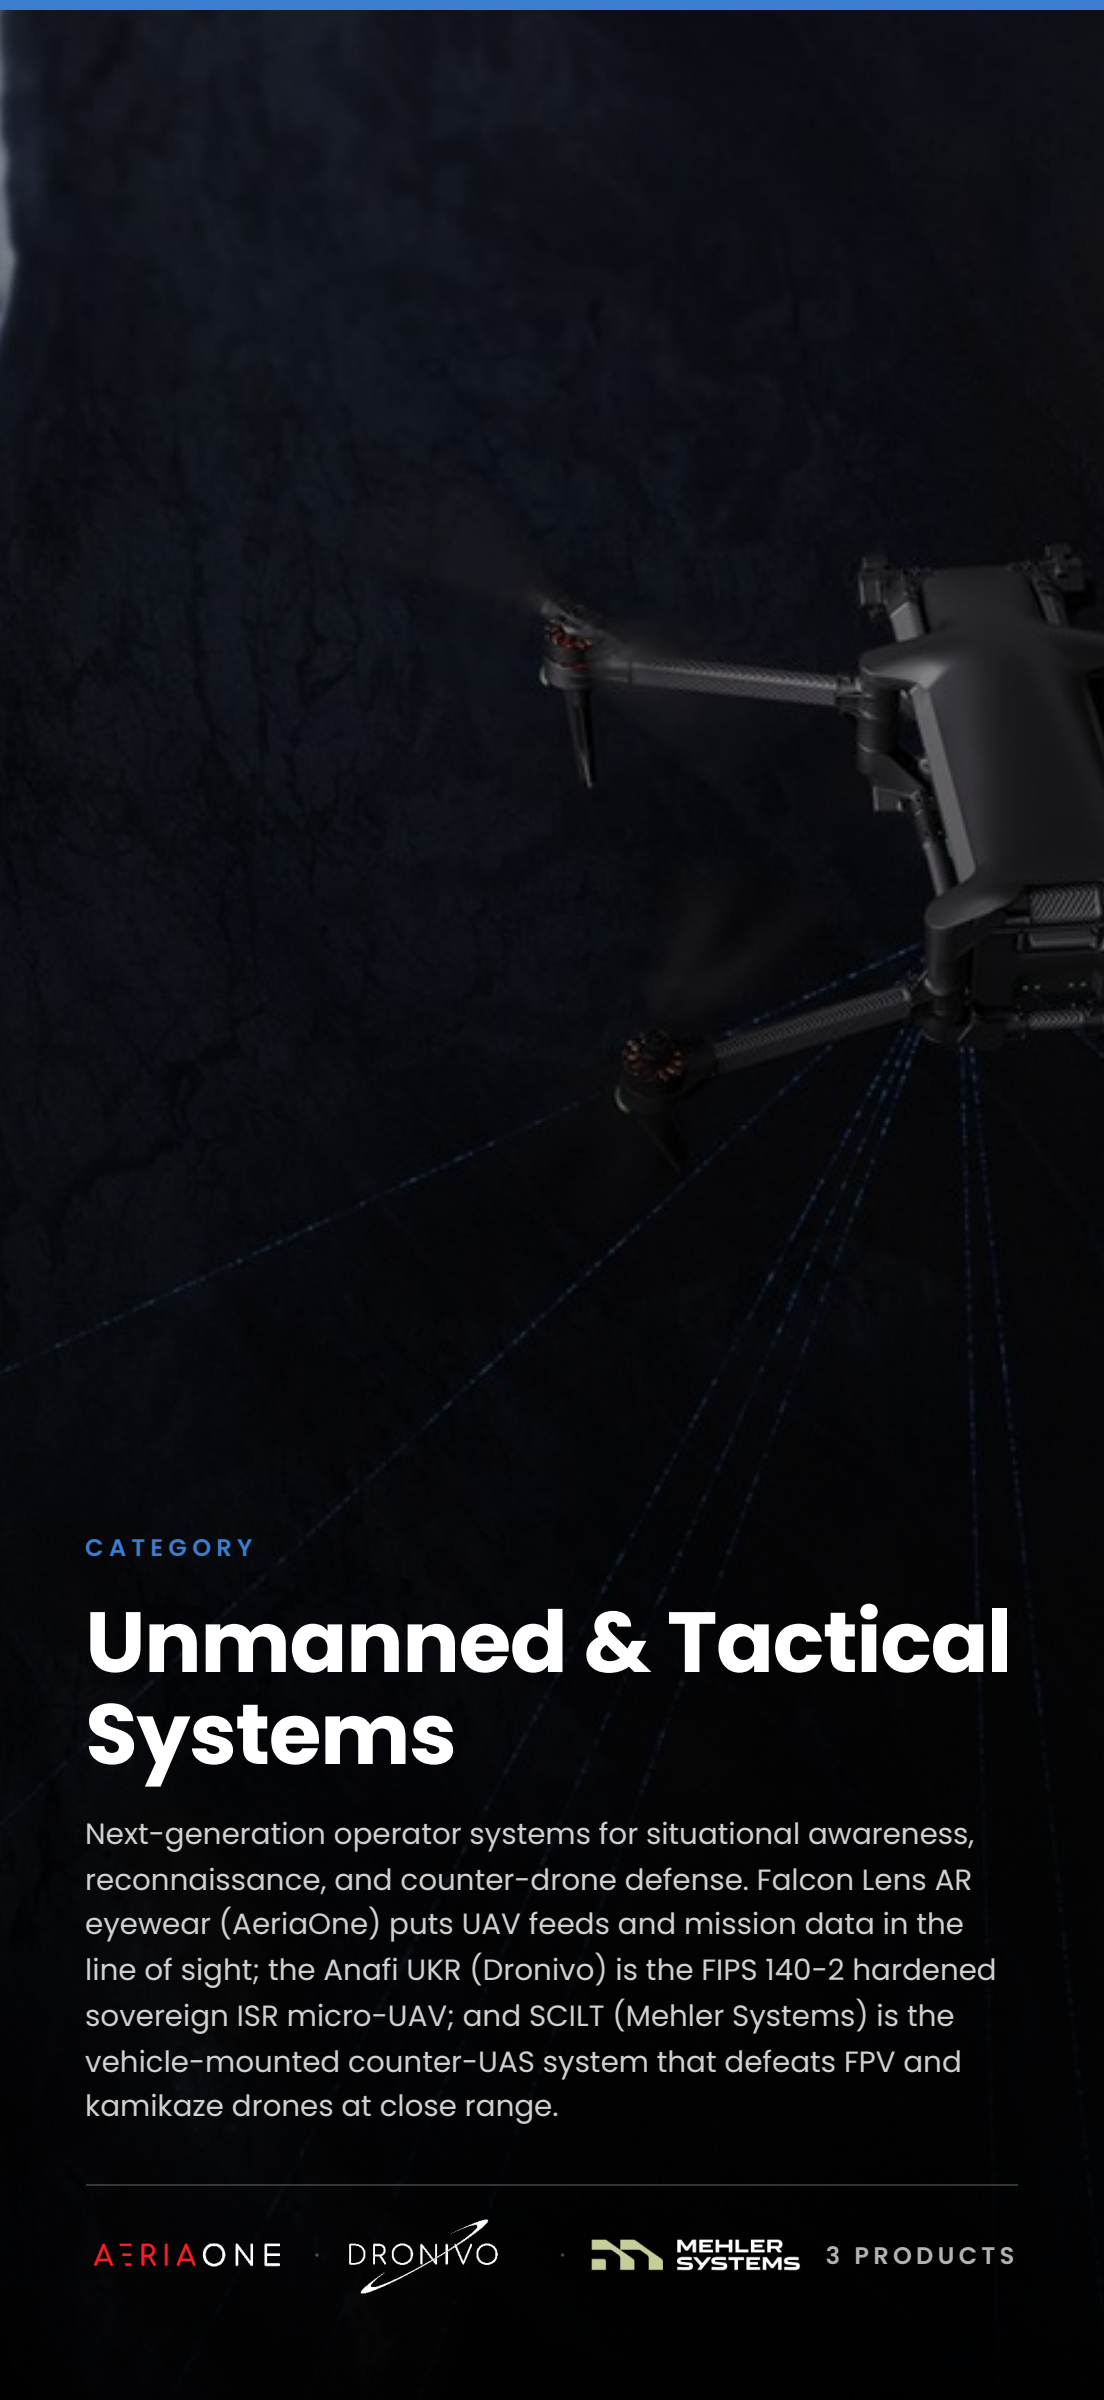

- M-RACC KE: projectile & fragment protection
- M-RACC BLAST: explosion & risk-mitigation systems
- M-RACC OVERMATCH: modular wall/protected-area systems
- Protects control cabinets, supply lines, cable trays
- Targets: substations, pipelines, comms towers, bridges

APPLICATIONS

Critical infrastructure

Energy

Telecom

CATEGORY

Unmanned & Tactical Systems

Next-generation operator systems for situational awareness, reconnaissance, and counter-drone defense. Falcon Lens AR eyewear (AeriaOne) puts UAV feeds and mission data in the line of sight; the Anafi UKR (Dronivo) is the FIPS 140-2 hardened sovereign ISR micro-UAV; and SCILT (Mehler Systems) is the vehicle-mounted counter-UAS system that defeats FPV and kamikaze drones at close range.

SYSTEMS

3 PRODUCTS

Falcon Lens — AR Tactical Eyewear

AERIAONE

The world's first augmented-reality tactical eyewear. Falcon Lens delivers real-time mission data, UAV and robotics feeds, and live overlays directly in the operator's line of sight — see, decide, act.

KEY FEATURES

- Live data overlay — mission info in your line of sight
- Native UAV & robotics integration (see what your systems see)
- Field-ready ruggedized design for operational environments
- Improved situational awareness — faster decisions under pressure
- Markets: public safety, defense, infrastructure inspection, autonomy

APPLICATIONS

Public safety

Defense

Infrastructure inspection

Anafi UKR — Sovereign ISR micro-UAV

The sovereign ISR micro-UAV for defense, public safety, and government. A 21 MP dual-EO and FLIR Boson thermal payload with 35× hybrid zoom, GNSS-denied optical navigation, jam- and spoof-resistant secure links, and FIPS 140-2 hardened data — deployable from the operator's hand.

KEY FEATURES

- Dual EO sensors (21 MP, 4K) with 35× hybrid zoom + FLIR Boson 640 thermal
- Up to 70-min flight and 40 km range (XLR battery); 5,000 m ceiling
- Secure links: 5G, Wi-Fi (8 km), plus MARS and LoRa backup (up to 55 km)
- GNSS-denied optical navigation with jam- and spoof-resistant operation
- AES-256 links, AES-XTS 512-bit SD encryption, FIPS 140-2, IP53, -36 to +50 °C

CERTIFICATIONS

FIPS 140-2

APPLICATIONS

Defense

Public safety

Government

SCILT — Close-Range Active Counter-UAV System

A close-range, active counter-UAV system that defeats kamikaze and FPV drones and loitering munitions attacking from short distances and low angles. SCILT is the dedicated last-layer defense for individual platforms — land, sea, and air — bridging the gap between large-scale air defense and passive protection with cost-efficient, shotgun-caliber effectors.

KEY FEATURES

- Defeats FPV, kamikaze drones, and loitering munitions at close range
- Sensor-supported (optronics, radar, image recognition) and fully autonomous modes
- 360° coverage with elevation engagement — lateral, frontal, and low-angle vectors
- Cost-efficient shotgun-caliber effectors: rubber, fragmentation, hardened-core, AP
- SCILT Land, Sea, and Air configurations; scales from single drones to swarms

APPLICATIONS

- Counter-UAS
- Military
- Force protection

Six names, one accountable representative

Flagship structural firefighting PPE, technical rescue wear, CBRN apparel, and the American Heritage helmet line. NFPA-certified and field-proven worldwide.

Tactical and FR-rated uniform systems for law enforcement and military operators. The Hero line — HeroShield, HeroCert, HeroGuard — covers daily duty through emergency response.

Global benchmark in ballistic body armor, plate carriers, platform armour (ProTec3D), and M-RACC critical-infrastructure protection. Trusted by police and military worldwide.

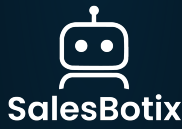

World's first augmented-reality tactical eyewear. Falcon Lens puts UAV feeds, mission data, and robotics overlays directly in the operator's line of sight.

Sovereign ISR micro-UAV — the Anafi UKR. Dual EO/IR payload, FIPS 140-2 hardened, secure radios, adopted by defense and public-safety agencies.

Combat-proven tactical clothing from Slovenia — the Striker BDU system, P-40 modular apparel, Monsoon rain shells, and Delta cold-weather layers. Part of Mehler Systems
